

CHRISTOPHER SANTOYO

Software Developer/IT Specialist

Bulakan, Bulacan | christophersantoyo7@gmail.com | +63 976-364-2730

PROFESSIONAL SUMMARY

Dynamic Software Developer and IT Specialist experienced in web application development and system implementation. Proven track record in building comprehensive data visualization and automated preprocessing tools, combining technical proficiency across multiple programming languages with a strong understanding of process design. Driven to deliver innovative, executive-ready digital solutions.

PROFESSIONAL SKILLS

Leadership

Adaptability to surroundings

Accessibility

Interaction Design

Time management

Client Collaboration

Responsive Design

Visual Design

TECHNICAL SKILLS & ACHIEVEMENTS

- **Languages:** TypeScript, HTML, CSS, JavaScript, Python, Java, C#, SQL, Dart
- **Frameworks:** React, Next.js 14, Tailwind CSS, Supabase, Neon, REST APIs
- **Design Tools & UI Patterns:** Figma, Adobe Photoshop
- **AI Tools & Development:** VS Code, AI-Native IDEs, Claude, Gemini/AntiGravity
- **DevOps & Cloud:** Git/GitHub, Vercel, Neon, Amazon Web Services (AWS)
- **OS & Systems:** Windows, macOS, iOS, Android

PROJECTS

PayAnalytics - An Analytics Viewing app for Data Analysts

Project, 2026 | SP Madrid Law and Associates

- Developed a comprehensive web-based data visualization and reporting platform tailored for corporate data analysts. The application streamlines the pipeline from raw data ingestion to executive-ready insights.
- **Technologies Used:** TypeScript, Python, Tailwind CSS, Chart.js, PostgreSQL, Quadratic HQ Integration.

StatWash - A Data Cleaning app for Data Analysts

Project, 2026 | SP Madrid Law and Associates

- Engineered a dedicated data preprocessing web application designed to automate and simplify the tedious data cleaning and sorting phases of the analytics lifecycle.
- **Technologies Used:** TypeScript, Node.js, Express, Python (Pandas/NumPy), PostgreSQL, Tailwind CSS.

MotoResQue: Mobile Application Rescue for Malolos Motorcycle Riders

Capstone Project, 2025 | STI College

- Designed, developed, and successfully deployed a location-based mobile emergency rescue application designed to connect stranded motorcycle riders in Malolos with nearby roadside assistance and towing services.
- **Technologies Used:** React Native, Neon Database, Socket.io, Google Maps API, GPS Geolocation Services.

CERTIFICATIONS

AI Ready ASEAN Certificate — ASEAN Foundation

May 2026

Google Coursera - CyberSecurity Connect and Protect: Networks and Network Security

January 2026

Alison Cybersecurity Fundamentals Certificate

May 2025

SAP S/4HANA Certificate

December 2024

Oracle Java Fundamentals Certificate

September 2023

EDUCATION

Bachelor of Science in Information Technology

August 2022 - June 2026

System Technology Institute Malolos

- Relevant coursework in Information Technology

Gilroy High School – California, USA

August 2018 - June 2022

WORK EXPERIENCE

Software Developer/Data Analyst, S.P. Madrid Law and Associates (Intern)

January 2026 - June 2026

Parañaque, Philippines

- Managed the end-to-end development of web-based data visualization applications, enabling data analysts to efficiently view, filter, and clean high-volume datasets.
- Took initiative by leveraging existing technical frameworks, proactively refining system architecture and database queries as new data trends and complexities emerged.
- Communicated time-sensitive technical solutions and tool updates clearly and accurately between the development team and internal data analyst stakeholders.
